

CentroPelet A10

HERMETIC PELLET STOVE

Pellet firing stoves **CentroPelet A10** are hot air wood pellet firing stoves that heat the room with hot air using a fan built in the stove. They are made of steel with modern design and high efficiency. With their modern design they don't need much space in the room. The delivery standardly includes a remote control that can be used for controlling the operation of the stove and select the daily program.
